

Technical Information Sheet Chassis-Colour

ColorMatic chassis color is a premium, satin-finished acrylic coat for the quick coating of commercial vehicle chassis. Thanks to the broad-jet atomisation, it can also be used on larger surfaces. An extremely high content of pigments and specific additives provides high coverage, high film thickness, good hold and adhesion direct on metal.

To best prepare, thoroughly clean the surface to be painted with [ColorMatic Silicone Remover no. 174469](#) and as required, apply a primer or filler (e.g. [ColorMatic 2K Primer Filler, Art.Nr. 195327](#)). In addition, we recommend the use of [ColorMatic Spot Blender no. 114229](#) for spot repair to the edges.

Application:

Ideal for spot repairs and refinishing parts

Order informations
