

Technical Information RAL Acrylic Spray Paint

ColorMatic RAL acrylic spray paint is a premium, satin-finished acrylic coat with satin-finish - specially formulated for quick coating of industrial surfaces. Thanks to the broad-jet atomization, it can also be used on larger surfaces. An extremely high content of pigments and specific additives provides high coverage, high film thickness, good hold and good adhesion direct on metal.

To best prepare, thoroughly clean the surface to be painted with ColorMatic [Silicone Remover no. 174469](#) and, as required, apply a primer or filler (e.g. ColorMatic [2K Primer Filler no. 195 327](#)). In addition, we recommend the use of ColorMatic [Spot Blender no. 114 229](#) for spot repair on edges.

Application:

Ideal for spot repairs and refinishing parts
