

Technical Information 1K Epoxy Primer

ColorMatic 1K Epoxy primer is an all-purpose 1K primer that provides excellent adhesion and corrosion prevention on sheet steel, zinc-coated steel, aluminium and anodised aluminium. It is fast drying with good flow and can be applied wet-on-wet. It also offers good insulation against humidity.

It is best to pre-clean metal surfaces thoroughly with [silicone remover no. 174469](#), for fibreglass surfaces use [plastic cleaner no.190261](#). For best corrosion-protection, we recommend using the [ColorMatic 2K epoxy primer](#).

Applications:

Spot repair and refinishing parts.
