

Technical Information Aluminium Filler "styrene-free"

presto Aluminium Putty "styrene-free" is a 2-component polyester filling putty as mixture of a medium-elastic, highly reactive, amino-preaccelerated polyester resin with different mineral, environment-friendly fillers and aluminium pigments.

Applicable as filling compound for car repair, engine construction and for hobby works. Everywhere, where a large-area spreading is desired. Surfaces like metal, wood, div. plastics and concrete are easy to fill in the desired layer thickness. To fill and level out holes and to stabilise flimsy spots.

For preparation and finishing your filling job, we recommend our presto sand papers. We offer a wide assortment of fine and coarse papers for dry and wet sanding.
