

Technical Information Flip Flop

For special Flip-Flop effects. The achieved effect strongly depends on the quality and color of the surface to be painted. Specially impressing effect is achieved on a dark ground. Suitable for glass, ceramics, stone, metals and all surfaces painted with acrylic or nitro lacquers.

Depending on incidence of light and perspective of the spectator, the effect changes the colour.

For optimal effect a black glossy ground is necessary. We recommend to prime with DUPLI-COLOR Tuning Effect Primer black, art.no. 119668.
