

## Technical Information presto stop rust converter

---

presto stop Rust Converter is a rust converter and primer in one work step.

This rust restoration system merges with the neutralized rust layer to a metallic-organic iron complex. As primer on surfaces infested with rust it forms the basis for a durable lacquer finish.

Excellently suitable for the restoration of vehicles, machines and all kinds of facilities.

Recommendation: our presto assortment offers the right putty for all purposes, e.g. the presto Body Filler for universal use.
