

Technical Information Glass Fibre Material

presto glass fibre materials are available as web, fleece or mat in different sizes.

Web: Ideal for modeling and repairs of shaped, large components, as flexible and highly scalable.

Fleece: Ideal for small repairs (small rust damage, cracks and holes) as well as for surface coatings. Due to the finely textured surface ideal for exterior body sides.

Mat: Ideal for large-scale works and as well as vibration-stressed components. Stable and dense fiberglass material.

All products for laminating with presto polyester resin.

Order informations

There are no precuts to show.

Disclaimer of liability

This application-technological information is given to the best of our knowledge. The notes mentioned herein are, however, non-binding and do not exempt you from own tests to see whether the products supplied by us are suitable for your special application. The use and processing is beyond our control and therefore exclusively in the responsibility of the user. European Aerosols is let off the liability, unless the liability-based incident is caused by a fault incurred to European Aerosols.

As of March 2, 2018

This release replaces all eventually earlier issued versions.
