

Technical information Spot Blender

ColorMatic spot blender is universally applicable for spot blending of 1K and 2K clear coats as well as for 1K and 2K topcoats. It is specially formulated to ensure the overspray will blend into the transition zone, leaving no visible difference between the old and new paintwork. This reduces the need to polish.

Apply ColorMatic 2K Hi-Speed Clear Coats or 2K topcoats to the blended area, immediately after application.

Application:

Ideal for spot repairs.
