

Technical Information Rust Converter Spray

presto stop Rust Converter Spray is a rust converter and primer in one work step.

This rust restoration system on epoxy resin basis merges with the neutralized rust layer to a metallic-organic iron complex. This black, very compact protection layer builds the primer and is the basis for the subsequent, durable lacquer finish.

Excellently suitable for the restoration of vehicles, machines and all kinds of facilities.

Recommendation: our presto assortment offers the right putty for all purposes, e.g. the presto Body Filler for universal use.
