

Technical Information NC Fine Filler

presto NC Fine Filler is a 1-component, air-drying nitro combi filler for smoothing and egalizing marks from sanding on filled and sanded surfaces. The pore-free, smooth surface forms after very fine wet sanding the ideal condition for the subsequent primer and topcoat.

For use on many surfaces, e.g. metals, hard plastics and all putties.

For preparation and finishing your filling job, we recommend our presto sand papers. We offer a wide assortment of fine and coarse papers for dry and wet sanding.
