

Technical information spare spray nozzles

The optimally balanced technology of valve and spray nozzle at ColorMatic products is also a reason that spraying like a spray gun is possible. If the spray nozzle doesn't work at unpredicted reasons, it is advisable to have the matched nozzle at your fingertips. 6 different original spray nozzles in packs of 10 are available. The respective products to the spray nozzle are listed on the backside.

Application

Quick replacement of spray nozzles for professional spot repair

Quality and properties

- six of the most important types of spray nozzles which are used at ColorMatic
- Quick change if the nozzle is damages
- Original high quality accessory
- Favorably pack of 10

 - Variable spray head: spray jet is horizontal and vertikal adjustable, also the width of spray jet
 - broad jet nozzle: horizontal and verticale adjustment of the spray jet
 - round jet: consistent spray jet
- **Content:** each 10 St.

Environment and labelling

Environmentally sound: European Aerosols is committed to apply formulations without restricted or critical ingredients and to achieve best possible performance. The caps and packagings are made of recyclable material.

Disposal: Only the completely emptied cans should be put into the recycling skip or appropriate container for reclaimable refuse. Cans which are not empty should be disposed off as "special refuse".

Marking/Labelling: All products made by European Aerosols comply with the actual labelling regulations according to Preparation Guideline 1999/45/EG. All aerosols correspond to TRGS 200 and TRG 300 as well as to aerosol guideline 75/324/EWG in the actually valid version.

Using instructions

Before use, carefully read and observe the warning texts on the label!

- Please refer to the attached instructions for detailed explanation

If you want to try a nozzle which you normally wouldn't find at this product, you should test it absolutely before application.

Please note: Put on and take off the nozzle always with a rotary motion. Put on the new nozzle always immediately, otherwise the sealing gasket beneath could swell and cause problems.

Following an overview about the used nozzles.

6 Rundstrahl Sprühkopf. Zielgerichtetes Sprühen. Art.Nr. 379413

Extraction tips

You will achieve highest security and maximum efficiency if you position the funnel of the extraction system as close as possible to the object in question. This improves extraction performance to a considerable extent.

Disclaimer of liability

This application-technological information is given to the best of our knowledge. The notes mentioned herein are, however, non-binding and do not exempt you from own tests to see whether the products supplied by us are suitable for your special application. The use and processing is beyond our control and therefore exclusively in the responsibility of the user. European Aerosols is let off the liability, unless the liability-based incident is caused by a fault incurred to European Aerosols.

As of January 17, 2014

This release replaces all eventually earlier issued versions.
